Predator Atlas 8

PREDATOR ATLAS 8 PA08-I51-G9Q2

(PN: NH.U7XEF.003 - EAN: 4711721258422)

- Nome commerciale: Predator Atlas 8

PC-INSPIRED PERFORMANCE. FREEDOM ON THE GO.
The Intel® Arc™ G3 processor and Intel® Arc™ graphics card deliver high-end portable gaming power in a full-fledged Windows device, whilst XeSS 3 technology, AI support and the Intel® graphics card help ensure optimal visual fluidity, even in the most demanding scenes. The result: a portable platform designed to perfectly balance visual detail, speed and flexibility.
PREDATOR AEROBLADE
10% INCREASE IN AIRFLOW
The Predator AeroBlade cooling system combines a dual-fan airflow, a precision metal fan and Vortex Flow technology to manage thermal pressure more effectively, ensuring more stable performance and better system control as gaming sessions become more intense, longer and more demanding.
PREDATOR AEROBLADE: 10% INCREASE IN AIRFLOW
The Predator AeroBlade cooling system combines dual airflow, a precision metal fan and Vortex Flow technology to manage thermal pressure more effectively, ensuring more stable performance and better system control as handheld gaming sessions become more intense, longer and more demanding.
ADJUSTABLE TRIGGER MODES
The dual-mode trigger design enhances control versatility by allowing you to tailor the feel of gameplay to suit the genre. Use the responsiveness of the micro-switches for shooters, or switch to full-travel analogue control for racing games, flight simulators and other titles that benefit from a greater range of motion and pressure variation.
DESIGNED FOR MORE PRECISE CONTROL
Contoured grips, an enlarged palm rest area, recessed buttons and a non-slip texture help your hands maintain a more stable grip, promoting more precise controls and better control during long gaming sessions.
8-INCH WUXGA SCREEN
The 8-inch 16:10 WUXGA screen provides PC gamers with more usable vertical space for maps, menus, inventories and head-up displays (HUDs). A 120 Hz refresh rate, a maximum brightness of 500 nits and a low-reflection protective glass help maintain image clarity indoors, on the move and in bright conditions.
UP TO 60 WHRS OF BATTERY LIFE
The built-in battery capacity, of up to 80 Whrs, supports greater on-the-go use whilst travelling, during downtime and in everyday life, retaining more power in the portable console for users seeking portability without compromising on a full gaming setup.
TAKE CONTROL WITH PREDATOR SENSE
The dedicated PredatorSense button offers quick access to real-time monitoring, performance modes and gaming settings, whilst the comprehensive app extends control to optimisation, lighting and device management, keeping the handheld console’s key settings at your fingertips whilst gaming.
FAST CONNECTIVITY, MORE CONNECTION OPTIONS
Wi-Fi 7, two Thunderbolt™ 4 ports and expandable storage offer greater configuration flexibility, going beyond simple on-the-go use and making it easy to switch from mobile use to gaming via the docking station.
