PART 1: CONTENT LOCALIZATION IN 4 STEPS

STEP 1: Features and specifications

- Please check the following content on both pages and make sure they are available in your market, else please localize:

  1. Features   2. Specifications   3. Accessories and corresponding images   4. Services

- Please update the last section on the second page on which other relevant product categories the customer should look at if they feel the current product does not suit their requirement.

STEP 2: Call-to-action changes

- The toll-free number included on each page is a dummy number. Please customize it to your market.

- Please ensure that all the hyperlinks are appropriately working.

STEP 3: Localize legal footnotes

- We try our best to provide guidance on legal footnotes in the WW version especially on standard footnotes and any product claims being made. But it is not practically possible at a WW level to cover all the guidance that can work across multiple geos. It is the responsibility of the local team to check the legal footnotes on both pages and add/remove footnotes per their local legal requirements.

- If you are making any additional product/feature/customer claims, please make sure you support it with the right legal footnotes within the datasheet.

STEP 4: Alliance compliance

a. **MANDATORY:** Local MDA approvals: The WW version has been made MDA compliant However, it is the responsibility of the geo/region/country team adapting the datasheet to ensure it's uploaded again for MDA compliance after localization.

b. **ALLIANCE FUNDING:** If the datasheet is funded by an alliance partner, please adapt the datasheet to those guidelines. You may choose to remove the Intel logo from both pages if the tactic is not being funded by Intel.

PART 2: SEO COMPLIANCE IN 5 STEPS

Pdfs can get indexed by search engines just like a normal webpage. It's important that we optimize them for search, else they may not rank very high in search results. Or may not get indexed and found at all.

Once you have localized the datasheet content (from PART 1 above) and have the pdf ready, we recommend you follow these simple steps to make this datasheet more SEO-friendly, before you upload the datasheet online. It should take you all of 5 minutes.

You need the full version of Adobe Acrobat (NOT Adobe Reader) to be able to do this. Please request your agency to take care of this.

STEP 1: Is the file name clear and self-explanatory?

If you're changing the file name from what is used for the WW file, then make sure it is not too long and gives an easy indication to the reader what the file is about, eg: **Legion ThinkPad Thunderbolt 4 Smart Dock Gen 2 7500_DS.pdf** is finebut "Lenovo _Vietnam_Hires_53627_convertible.pdf" is not clear.

STEP 2: Has your file metadata been updated?

Go to File> Document properties>Description and update the fields as below:

File – automatically takes the file name you have chosen | Author – Lenovo | Title – Please use – **Legion ThinkPad Thunderbolt 4 Smart Dock Gen 2 7500**

Subject – Please use - **Thunderbolt™ docking. Made smarter.**

Keywords – **Lenovo ThinkPad Thunderbolt 4 Smart Dock Gen 2 7500, Cloud-based Manageability, Lenovo Accessories Fleet Manager (LAFM) Help, 100W of Power via PD 3.1 and Four Always-on Charging USB Ports, 90% Post-consumer Recycled Materials, Plastic-free Packaging, TÜV-certified, HDMI 2.1, Intel Evo Technology Certification; Windows 10 and Above, macOS Sequoia, macOS Sonoma System Supported, Amazon AWS Cloud Service.**

Under Additional metadata (if available in your Adobe Acrobat version), update as follows: | Copyright Status: Choose 'Copyrighted' | Copyright Notice: Copyright (c) 2018 by Lenovo Corporation | Copyright Info URL: http://www.lenovo.com/legal/copytrade.html | Under Advanced metadata (if available in your Adobe Acrobat version), update as follows: | Language – choose the appropriate language from dropdown list

STEP 3: Is the reading order correct?

• Select Advanced>Accessibility>Add Tags to Document • Then, select Advanced>Accessibility>Touch Up Reading Order • The "reading order" of the PDF is displayed. This shows you what content will be displayed first in a search result. If this is not fixed, sometimes even the legal line can get picked up to display in a search result. • You can use the same 'Touch Up Reading Order' tool to change the reader order. • Reading order can be fixed as below – Headline followed by Body copy followed by Why buy section followed by Who buys section.

STEP 4: Have your pdf elements been tagged correctly?

• Go to File>Document properties>Description • Run an Accessibility Full Check to look for non-compliance. • Is the body copy on page 1 tagged as text? • Is the main product image on page 1 tagged as Image/Figure? • Add the product name as Alt Text to the main product image.

STEP 5: Pdf size and version

1. Total web page weight should not be much more than 1-2MB. If it is more, then go to Advanced>PDF Optimizer and 'right-size' the document.
2. Then select Preferences>General Settings>Optimize for Fast Web View (this allows the PDF to be "loaded" a page at a time, rather than waiting for the whole PDF to download to be able to read).
3. For datasheets which don't have an animated product image on page 1, save your PDF as version 1.6 (Acrobat 7) or lower.

Lenovo ThinkPad

ThinkPad Thunderbolt 4 Smart Dock Gen 2 7500

Thunderbolt™ docking. Made smarter.

Redesigned from the inside out, the ThinkPad Thunderbolt 4 Smart Dock Gen 2 7500 is built to power the modern professional. As the evolution of our first-generation Smart Dock, it now delivers sharper display performance, intelligent cloud-based manageability, and a seamless user experience—perfect for the hybrid workplace.

Why you need ThinkPad Thunderbolt 4 Smart Dock Gen 2 7500

Intelligent cloud control
Let your IT team take charge remotely with Lenovo Accessories Fleet Manager (LAFM), a cloud-based platform that makes managing your dock fleet as simple as a few clicks. System overviews, firmware updates, and diagnostics happen without interruptions, so your focus never breaks.

Unrivaled display & power
Engineered for multitaskers, this dock supports up to 1 x 8K @ 60Hz or dual 4K @ 144Hz displays—ideal for ultra-detailed visuals and smooth refresh rates. Plus, with up to 100W of power via PD 3.1 and four always-on charging USB ports up front, it keeps your devices powered and productive.
Sustainably designed
Crafted using 90% post-consumer recycled materials and shipped in 90% recycled, plastic-free packaging, this dock is as thoughtful as it is powerful. With its TÜV-certified low carbon footprint, it meets today's sustainability standards without compromising performance.

---

[1]   Lenovo USB-C and Thunderbolt™ Docks function with laptops that support industry standard USB-C Alt-Mode, DisplayLink, or Thunderbolt™ protocols through their Type-C™ port. Lenovo USB-C and Thunderbolt™ Docks support additional features, such as MAC address passthrough, WOL, and mirrored power button, on most Lenovo ThinkPad laptops, but such features may not be available on certain other non-Lenovo branded laptop systems.

[2]   The real resolution will depend on your PC and Monitor capability.

[3]   Depending on many factors such as the processing capability of peripheral devices, file attributes, and other factors related to system configuration and operating environments, the actual transfer rate using the various USB connectors on this device will vary and is typically slower than the data rates as defined by the respective USB specifications: - 5 Gbit/s for USB 3.1 Gen 1; 10 Gbit/s for USB 3.1 Gen 2 & 20 Gbit/s for USB 3.2.

[4]   "xx" denotes a country code specific PN.
